

TRAK VMCSi

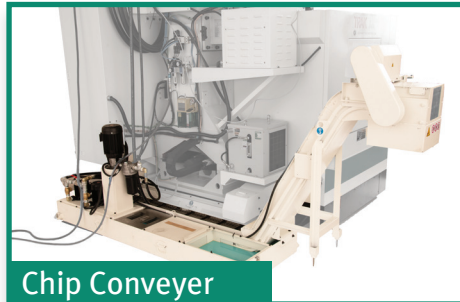

Transformative Technology
Your Shop Can Use

Today Make great parts, fast.
The features you need for production machining.

Coolant Through Spindle

Chip Conveyor

Within Days Powerful new capability,
affordable and easy to use.

Probing

4th Axis

Multiple Clamping

Supported by training that gets you running fast!

Your Future Starts Now

The exciting new world of automation and digitalization...working for you!

Unattended Machining to slash your labor expense.

Connected Machines for advanced management of jobs and entire shops.

Digital Twin for realistic simulations you can use to optimize your spindle uptime.

Artificial Intelligence and Machine Learning that performs magic such as adapting feed rates based on experience.

Automation Solutions such as robotics and integrated part conveyors, controlled by a single, convenient interface.

...and this technology is just getting started!

60 x 27.5 x 25" Travel

50 x 27.5 x 25" Travel

40 x 20 x 20" Travel

30 x 20 x 20" Travel

Features

- Spindle speed range 10 – 12,000 RPM
- 24-station arm-style tool changer
- Coolant Through Spindle standard
- Chip conveyer Standard
- Linear Roller Bearing Slides all axes

SINUMERIK ONE

by Siemens

Built for the Digital Age with connectivity and an open platform designed in.

Feature set that reflects decades of leadership in production machining.

Built for the Digital Age to evolve as your shop does.

Selectable programming for an easy transition from any CNC.

RMVM – rich Digital Twin simulations of your machines and your programs. Increase profits now by optimizing programs.

Create your future by learning new, complex tools before you commit the time and money.
